**United States Army  
Materiel Command**

## **Mr. Ronald Lewis**

Mr. Lewis began serving a detail as the Acting Deputy G-3 for Enterprise Integration, U.S. Army Materiel Command (AMC) on 21 April 2003. In this capacity, he works in a collaborative environment with the Department of the Army staff and Secretariat, the Combined Arms Support Command (CASCOM), the Program Executive Officer, Enterprise Information Services, and other Program Managers to integrate and modernize the Army logistics automation environment. The AMC Deputy G-3 for Enterprise Integration serves as the key senior level advisor to the AMC G-3 for the entire enterprise integration of all Army echelons of logistics automation and business process reengineering, to include financial interface, acquisition, and migration of legacy systems functionality and reengineering of that technical and product data.

Mr. Lewis has served as the Director of the Lead AMC Integration Support Office (LAISO) at Redstone Arsenal since July 1995. In this capacity, he has responsibility for planning, prioritizing and monitoring the execution of AMC logistics functional requirements for assigned business areas into the Logistics Modernization Program. He works functional integration activities with the CASCOM for the Global Combat Support System initiative. Mr. Lewis also serves as the functional configuration manager for the Commodity Command Standard System and Standard Depot System and ensures the business process re-engineering integration across AMC for assigned business areas.

In addition to earning a Bachelors Degree in Secondary Education from Southern State College, Magnolia, Arkansas in 1974, Mr. Lewis is a member of the Army Acquisition Corps. He has received numerous honors and awards for his professional accomplishments including Superior Civilian Service (2), Civilian Achievement Medal, and numerous exceptional performance awards.

Prior to being named the LAISO Director, Mr. Lewis served as LAISO's Chief of the Enterprise Management Division from September 1995 to July 1999. In this capacity, he was responsible for the technical and integration planning efforts associated with the various Corporate Information Management efforts.

From 1987 to 1993, Mr. Lewis was the Chief of the Application Development Division within the Standard Depot System Modernization (SDS MOD) office located at Chambersburg, PA. He also served at various times as the Project Manager SDS MOD for the Program Executive Officer for Standard Army Management Information Systems. He was responsible for the development of Life Cycle Management documentation and the management process of modernizing the complete SDS system.

Other developmental assignments included serving as Chief, Resource Management Branch, Depot Systems Command (1985-1987); Chief, Systems Support Branch, New Cumberland Army Depot (1980-1985); and other positions at New Cumberland Army Depot and Anniston Army Depot.
